EDUCATION

Clemson University | Clemson, SC

January 2023 - December 2025

Bachelor of Science in Computer Science | Magna Cum Laude

Cumulative GPA: 3.9/4.0

- President's List Spring 2023, Spring 2024, Fall 2024, Fall 2025

University of South Carolina | Columbia, SC

August 2018 - December 2021

Bachelor of Science in Biological Sciences | Magna Cum Laude

Cumulative GPA: 3.8/4.0

- Dean's List Fall 2018 - Fall 2021, President's List Fall 2021

SKILLS & TECHNICAL TOOLS

Languages: C#, C++, C, Java, Python, TypeScript, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: React, Ember.js, .NET Core, Tailwind CSS

DataBases: MySQL, MS SQL Server

Cloud & DevOps: AWS (EC2, RDS, Lambda, API Gateway), Docker, Git, GitHub, CI/CD Pipelines

Tools: Figma, UNIX/Linux, SSH, Vim

EXPERIENCE

Software Engineer Co-Op | Alarm.com | Greenville, SC

January 2025 - May 2025

- Refactored firmware simulation and .NET backend logic for software-simulated security panels, improving stress testing reliability and platform scalability by ensuring test accounts were provisioned with accurate device configurations.
- Extended a C# and ASPX internal tool to generate configurable rental community templates with mock tenant data, reducing manual setup time for onboarding and product demos.
- Implemented a cross-database audit trail system using SQL stored procedures and C# service integrations to aggregate and display unified change logs through an ASPX interface.
- Authored and presented low- and high-level design documentation evaluating integration strategies and trade-offs, driving architectural alignment across senior engineers and cross-functional stakeholders.

Software Engineer Co-Op | Alarm.com | Greenville, SC

May 2024 - August 2024

- Developed and deployed a full-stack remote door lock/unlock control feature integrating Ember.js (TypeScript) and a .NET Core API within live camera feeds, supporting 20,000+ commercial customers.
- Prepared and annotated building floorplan datasets to train AI/ML models for automated room recognition, enabling accurate sensor placement on digital maps.
- Maintained and improved production applications across the full stack (Ember.js, .NET Core, MS SQL Server), driving reliability through bug fixes, unit testing, and code reviews.

PROJECTS

Resume Website

- Built and deployed a personal portfolio site using React, TypeScript, and Tailwind CSS, showcasing projects and technical skills to prospective employers.
- Architected a responsive, component-based layout with reusable React components for scalable content management.
- Configured a CI/CD pipeline with GitHub Actions to automate builds and deployments to GitHub Pages on every push.

Truck Driver Rewards Web App

- Led full-stack development of a points-based safe driving rewards platform in an Agile environment, delivering core features across iterative sprints.
- Built a responsive React front end integrated with AWS Lambda and Amazon RDS (MySQL), supporting user management, transactions, and product catalog features.
- Implemented end-to-end store, points, and redemption workflows with transaction history, improving user experience.
