## EDUCATION

**Clemson University | Clemson, SC**  
**Bachelor of Science in Computer Science**

January 2023 - December 2025

*Cumulative GPA: 3.9/4.0*

- Magna Cum Laude
- President's List Spring 2023, Spring 2024, Fall 2024, Fall 2025

**University of South Carolina | Columbia, SC**  
**Bachelor of Science in Biological Sciences**

August 2018 - December 2021

*Cumulative GPA: 3.8/4.0*

- Magna Cum Laude
- Dean's List Fall 2018 - Fall 2021, President's List Fall 2021

## SKILLS & TECHNICAL TOOLS

**Languages:** C#, C++, C, Java, Python, HTML, CSS, TypeScript, JavaScript, SQL

**Frameworks & Tools:** React, Ember.js, .NET Core, Vite, Tailwind CSS, MySQL, MS SQL Server, Git, GitHub, Bitbucket, Jira, Azure DevOps, Trello, Figma, UNIX/Linux, AWS (EC2, RDS, Lambda, API Gateway), VS Code, Visual Studio, JetBrains Rider, IntelliJ, Cursor, Docker, JMP

## EXPERIENCE

**Software Engineer Co-Op | Alarm.com | Greenville, SC**

*January 2025 - May 2025*

- Refactored virtual panel firmware and .NET backend by updating version hex identifiers and extending class logic to ensure virtual accounts were provisioned with correct panels and device lists, improving stress testing and scalability.
- Enhanced a C# and ASPX internal community creation tool by extending backend functionality to generate configurable communities, housing units, and residents, streamlining onboarding and demos.
- Implemented a cross-database audit trail system using SQL stored procedures and C# service integrations to aggregate and display unified change logs through an ASPX interface.
- Authored and presented low- and high-level design documentation to senior engineers and stakeholders, detailing architecture changes, integrations, and implementation trade-offs.

**Software Engineer Co-Op | Alarm.com | Greenville, SC**

*May 2024 - August 2024*

- Developed and deployed a full-stack feature integrating Ember.js (TypeScript) and a .NET Core API to enable remote door-lock control within live camera feeds, supporting 20,000+ commercial customers.
- Prepared and labeled building floorplans to train AI and machine learning models for automated room and structural feature recognition, enabling accurate sensor placement on digital maps.
- Built and maintained production applications using Ember.js (TypeScript, Sass, Handlebars), .NET Core (C#), and MS SQL Server, ensuring reliability through bug fixes, unit testing, code reviews, and feature enhancements.

## PROJECTS

### Resume Website

- Developed a personal resume website using React, Vite, TypeScript, and TailwindCSS to highlight technical skills.
- Built a responsive, component-based React UI composed of reusable section and card components.
- Automated production builds and deployment to GitHub Pages using GitHub Actions.

### Truck Driver Rewards Web App

- Built a full-stack web application in an Agile environment to reward safe driving through a points-based incentive system.
- Developed a responsive front end using HTML, CSS, and JavaScript, integrated with AWS Lambda APIs and an Amazon RDS (MySQL) backend for user, transaction, and product management.
- Implemented store, points, and redemption workflows, including transaction history tracking, to enhance user experience and system usability.
