EDUCATION

Clemson University | Clemson, SC

January 2023 - December 2025

Bachelor of Science in Computer Science | Magna Cum Laude

Cumulative GPA: 3.9/4.0

- President's List Spring 2023, Spring 2024, Fall 2024, Fall 2025

University of South Carolina | Columbia, SC

August 2018 - December 2021

Bachelor of Science in Biological Sciences | Magna Cum Laude

Cumulative GPA: 3.8/4.0

- Dean's List Fall 2018 - Fall 2021, President's List Fall 2021

SKILLS & TECHNICAL TOOLS

Languages: C#, C++, C, Java, Python, TypeScript, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Ember.js, ASP.NET, .NET Core, Tailwind

Databases: MySQL, MS SQL Server

Cloud & DevOps: AWS (EC2, RDS, Lambda, API Gateway), Docker, Vercel, Git, GitHub, CI/CD Pipelines

Tools: Figma, shadcn/ui, UNIX/Linux, SSH, Vim

EXPERIENCE

Software Engineer Co-Op | Alarm.com | Greenville, SC

January 2025 - May 2025

- Refactored firmware simulation and .NET backend logic for software-simulated security panels, improving stress test reliability and platform scalability across simulated device configurations.
- Built internal tooling to generate configurable environments with synthetic tenant data, reducing manual setup time and improving test reproducibility.
- Implemented a cross-database audit trail system using SQL stored procedures and C# service integrations to aggregate and display unified change logs through an ASPX interface.
- Authored system design documentation evaluating architectural trade-offs (performance, scalability, maintainability), influencing engineering decisions.

Software Engineer Co-Op | Alarm.com | Greenville, SC

May 2024 - August 2024

- Developed and deployed a full-stack remote door lock/unlock control feature integrating Ember.js (TypeScript) and a .NET Core API within live camera feeds, supporting 20,000+ commercial customers.
- Labeled and annotated building floorplan datasets to train AI/ML models for automated room recognition, improving sensor placement accuracy on digital maps.
- Maintained and improved production applications across the full stack (Ember.js, .NET Core, MS SQL Server), driving reliability through bug fixes, unit testing, and code reviews.

PROJECTS

ResumeMatch | resumematch-dev.vercel.app | github.com/kknguye/resume-analyzer

- Built and deployed a full-stack AI resume analyzer using Next.js, TypeScript, and Google Gemini API that evaluates candidate fit against job descriptions with structured LLM outputs.
- Engineered a serverless API route handling PDF parsing, prompt engineering, and JSON response extraction to deliver fit scores, skill gap analysis, and resume improvement suggestions.
- Designed a responsive UI with React, shadcn/ui, and Tailwind CSS featuring drag and drop file upload, skeleton loading states, and dynamic result visualization.

Truck Driver Rewards Web App

- Contributed to full-stack development of a points-based safe driving rewards platform in an Agile environment, collaborating across iterative sprints to deliver core features on schedule.
- Built a responsive React front end integrated with AWS Lambda and Amazon RDS (MySQL), supporting user management, transactions, product catalog, and redemption workflows.
